I am a seasoned developer with a strong commitment to delivering quality solutions in the realm of web development. My expertise lies in crafting large products and robust APIs, showcasing a dedication to quality over quantity. With a proven track record of working with large-scale systems, I bring a wealth of experience to the table. I thrive on the challenges of designing and implementing efficient solutions, always pushing for excellence in every line of code. As a developer who values continuous improvement, I stay abreast of the latest technologies to ensure that my work remains at the forefront of industry standards. My portfolio is a testament to a career characterized by precision, innovation, and a passion for creating exceptional digital experiences.

Teamwork, Time management, Problem-solving

PROJECT DETAILS

• Sportaloca

Project Description: Sporta loca is the sports base project. The clinet belongs to the Philippines. They want to replicate the FIFA World Cup. It is their team that has registered for the tournament. 3 types of tournaments are available. 1 is the round robin. 2 is the double round robin. and the third one is the group stage. In a round-robin tournament, each team plays the other team only once. In a double-round robin tournament, each team plays the other team twice, like in the IPL. group stage means each team is divided into groups and plays a particular group, then selects the top two teams from every group and then starts to knockout round.
Responsibilities: My role in that project is that of a web developer, and my responsibility is the main Write clean, efficient, and maintainable code. Analyze problems and design appropriate technical solutions. Write and execute unit tests to ensure code quality.
Technologies: php, laravel, Node JS, HTML, CSS, JS,Bootstrap
Industry: Sports

• Video Poratal

Project Description: That project is a dual language, one in Arabic and the other in English. That's sort of a project, like having the client upload the video from the admin portal along with an added price and some description. and customers see that video, and according to price, they purchase that video and see that.
Responsibilities: My role in that project is that of a web developer, and my responsibility is the main Write clean, efficient, and maintainable code. Participate in sprint planning and task estimation. Provide feedback to peers and learn from the feedback received. Fix bugs and issues identified during testing phases. Maintain documentation to ensure it reflects the current state of the project.
Technologies: Laravel , Jquery, AJAX,Bootstrap
Industry: SaaS

• RadhaIVF

Project Description: RadhaIVF it' the hospitalizre project. And it's the hospital name. They want to save all patient records and also want easy practice with software. In that project main modules are the Appointment module,ANC module,IVF module,IUI module During appointment book time, check first if there's any appointment book already or not. If not, then directly book, but yes, at that time, check another slot to see if that day is a holiday or not. If yes, then the same loop is running.
Responsibilities: Before, my role was as a developer, but now I'm the team leader. And currently, four members are working on that project, including me. Work closely with other team members, such as designers, QA engineers, and project managers. My responsibilities include making the project's errors free, making the client happy, and managing a team. In between, I'm dealing with a team member issue and also taking on new requirements from the client side.
Technologies: PHP,Laravel,Bootstrap,AWS, JS, Twilio,
Industry: Healthcare
