Technologies: ruby on rails
Industry: Healthcare
Link: https://www.ultrahuman.com

• Remote code exectetion — May-2020 - June-2020

Project Description: Every person who is looking for a software engineering role has used some kind of interview preparation website like geeksforgeeks, leetcode , etc. Ever wondered how these run user code ? These websites allow users to run code on their servers , and instantly give the results. These websites have a dedicated service which handles this code execution . I tried building this code execution service and I am sharing my idea as I could not find any single concrete resource which talks about it. Of course there are many resources but they are scattered. readmore https://tiny.cc/codejudge
Responsibilities: Develop and blog the entire backend app. Implement the solution for a client, responsible for hosting and maintaining the project.
Technologies: Node, python
Industry: Software and Platforms
