Software and Cloud engineer, im able to build a complete backend solution and automate the deployment on any cloud infrastructure. Im proficient in java spring boot, as well as Golang. I hold an AWS solution architect certification and a Kubernetes administrator certification, both demonstrating my skills in managing not only cloud infrastructures, but also container orchestration platforms

INDUSTRIES: Human Resource Platform, Retail

TECHNICAL SKILLS

• Java	8 years
• Kubernetes	5 years
• AWS	5 years
• Docker	5 years
• golang	2 years

SOFT SKILLS

Teamwork, Communication, Critical thinking

PROJECT DETAILS

• Empulse June-2015 - June-2020

Project Description: HRMS and Payroll SaaS enterprise application to manage employees and have their attendance directly recorded in the payroll
Responsibilities: • Guided the development of a HRMS and Payroll SaaS enterprise application, showcasing leadership in steering the project to successful completion. • Directed and managed change requests using best practices in an agile environment • Executed the development and delivery of progress reports, risk assessments, documentation and presentations • Took the lead in orchestrating the migration from a monolithic application to a microservices architecture, demonstrating strategic vision and expertise in optimizing system scalability and flexibility
Technologies: Java, Spring boot
Industry: Human Resource Platform
Link: https://www.employeedomain.com

• Quotemachine February-2023 - January-2024

Project Description: QuoteMachine is a complete sales solution built to support unique, multi-touch business workflows from initial contact to final payment
Responsibilities: • Engineered a distributed cloud-based system utilizing work queues to enhance task management, significantly boosting platform scalability and resilience • Developed and deployed Change Data Capture processes to seamlessly integrate with search engines, enhancing data flow efficiency and search functionality • Implemented advanced scaling strategies leveraging Kubernetes orchestration and containerization technologies, optimizing system performance and resource allocations • Developed automated procedures to provision reproducible cloud environments, enhancing onboarding efficiency and facilitating the creation of temporary environments
Technologies: Golang
Industry: Retail
Link: https://www.quotemachine.com/en/

EMPLOYMENT HISTORY

• Senior Software Developer

Description: Engineered a distributed cloud-based system utilizing work queues to enhance task management, significantly boosting platform scalability and resilience • Developed and deployed Change Data Capture processes to seamlessly integrate with search engines, enhancing data flow efficiency and search functionality • Implemented advanced scaling strategies leveraging Kubernetes orchestration and containerization technologies, optimizing system performance and resource allocations • Developed automated procedures to provision reproducible cloud environments, enhancing onboarding efficiency and facilitating the creation of temporary environments • Competences: Golang, NoSQL, GCP, CircleCi, Terraform, Docker, Kubernetes, Helm, ArgoCD, Temporal, Elasticsearch

• Staff Developer August-2021 - February-2022

Zendesk

Description: Successfully scaled the infrastructure to support an additional geography, enhancing system performance and reliability, resulting in a 30% reduction in latency and a 20% improvement in overall system efficiency • Collaborated cross-functionally with Dev teams to streamline CI/CD pipelines, resulting in a reduction in deployment time and ensuring seamless integration of new microservices • Monitored system health and performance metrics, identifying bottlenecks and implementing optimizations, thereby enhancing platform reliability and scalability while maintaining high availability • Competences: AWS, MySQL, NoSQL, RabbitMQ, Terraform, Docker, Kubernetes, Helm, ArgoCD

• Cloud engineer October-2019 - August-2021

Container Solutions

Description: Orchestrated the entire development process for a cutting-edge platform leveraging AWS EKS, emphasizing a hands-on approach to ensure the successful realization of project objectives. • Achieved a 60% reduction in deployment errors by implementing automated testing within GitHub Actions, coupled with ArgoCD’s seamless deployment orchestration capabilities • Integrated Terraform for automated environment provisioning while concurrently driving the conceptualization and design of the platform architecture • Competences: AWS, GCP, Terraform, Atlantis, Docker, Kubernetes, Helm, ArgoCD, GitHub

• Senior Software Developer October-2017 - October-2019

PAYSAFE Group

Description: Led the seamless transition from Elastic Beanstalk to a Kubernetes-based platform, demonstrating strategic decision-making to enhance the organization’s infrastructure and cost optimization • Simultaneously designed the platform architecture, delivery workflows, and versioning strategy, ensuring a cohesive and efficient development ecosystem for a more streamlined development process • Guided the refactoring and evolution of the outdated microservices architecture, steering the organization towards an event-driven model, while concurrently contributing to backend development, achieving a 65% improvement on the system reliability • Competences: Java, Spring Boot, Spring Cloud, MySQL, Kafka, AWS, Terraform, Docker, Kubernetes

CERTIFICATION

• Certified Kubernetes Administrator by LinuxAcademy 2020

• AWS Certified Solutions Architect - Associate by AWS 2020

EDUCATION

• Bachelors degree in Software Engineering from Universite Laval 2009 - 2015

LANGUAGES

• English - advanced
