+91 9820045154 | hr@augmntx.com

5+ years of experience working in React and able to demonstrate strong JavaScript knowledge. 3+ years of experience working with NodeJS and Python. 3+ years of experience working with PostgreSQL and DynamoDB. Experience with CI and CD environment and AWS platforms. Proficiency working with Docker. Experience writing APIs and securing APIs. Proficiency working with ECS and EKS. Strong experience in systems architecture design and development.

INDUSTRIES: Information Technology

TECHNICAL SKILLS

• Node.js	5 years
• redis	5 years
• kubernetes	5 years
• NoSQL	5 years
• golang	5 years

PROJECT DETAILS

• MARS

Project Description: Designing and creating functional based components using React js, material Ui, React Strap, bootstrap. Also build custom functions using plain JavaScript to develop, deploy.
Responsibilities: ● Developing the latest user-facing features using React.js and Node js ● Designing a modern highly responsive web-based user interface ● Building reusable components and front-end libraries for future use ● Coordinating with various teams working on distinct layers ● A ReactJS developer is responsible for designing and implementing UI components for JavaScript-based web applications ● Meeting with the development team to discuss user interface ideas and applications. ● Reviewing application requirements and interface designs. ● Identifying web-based user interactions. ● Developing and implementing highly responsive user interface components using react concepts. ● Writing application interface codes using JavaScript following react.js workflows. ● Troubleshooting interface software and debugging application codes. ● Developing and implementing front-end architecture to support user interface concepts.
Technologies: reactjs,redux,python
Industry: Information Technology

• Inventory Management Tool, Cart Management Tool, Product Management Tool Technologies

Project Description: Develop an inventory management tool, cart management tool, product management tool, payment gateway integration, delivery management and search module.
Responsibilities: ● Establishes and designed user-friendly website, including optimized checkout pages ● Planned, developed, deployed and maintained web applications ● Create and test applications for websites ● Present design specs ● Work with graphics and other designers ● Troubleshoot website problems ● Maintain and update websites
Technologies: Node JS, Express JS, React JS and MongoDB
Industry: Information Technology

EMPLOYMENT HISTORY

• Backend Engineer September-2021 - January-2024

Description: ● A ReactJS developer is responsible for designing and implementing UI components for JavaScript-based web applications ● Meeting with the development team to discuss user interface ideas and applications. ● Reviewing application requirements and interface designs. ● Identifying web-based user interactions. ● Developing and implementing highly responsive user interface components using react concepts. ● Writing application interface codes using JavaScript following react.js workflows. ● Troubleshooting interface software and debugging application codes. ● Developing and implementing front-end architecture to support user interface concepts. ● Monitoring and improving front-end performance. ● Documenting application changes and developing updates. ● Experience in front end using React, Redux (Saga), HTML, CSS3 ● Experience in Design and developing web interfaces from wireframes and mockups. ● Experience in front end for the modern enterprise SAAS architecture with a REST API layer. ● Experience working in React and able to demonstrate strong JavaScript knowledge ● Experience working with NodeJS ● Experience working with PostgreSQL and DynamoDB ● Experience with CI and CD environment and AWS platforms ● Proficiency working with Docker ● Experience writing APIs and securing APIs ● Proficiency working with ECS and EKS ● Strong experience in systems architecture design and development ● Strong experience building single-page web applications ● Ability to efficiently manage and build large, complex web applications ● Strong analytical and problem-solving skills, with good attention to detail ● Self-motivated, ability to work independently ● Ability to use creative thinking to develop innovative solutions to business problems ● Strong project management skills, including the ability to manage multiple projects simultaneously ● Ability to mentor other developers ● Ability to work in a fast-paced team environment Project Title: MARS Description : Designing and creating functional based components using React js, material Ui, React Strap, bootstrap. Also build custom functions using plain JavaScript to develop, deploy.

EDUCATION

• Masters degree in MCA from Autonoumous 2016 - 2018

LANGUAGES

• English - advanced
