As a seasoned full-stack developer with a comprehensive skill set encompassing Java and its different framework, I consistently pursue new challenges to enhance my expertise. My commitment to self-learning and my diligent work ethic underscores my passion for software engineering, driving me to continually evolve and refine my abilities.

INDUSTRIES: FinTech

TECHNICAL SKILLS

• Java	4 years & 11 months
• Postman	4 years
• REST APIs	4 years
• API Integration	4 years & 11 months
• Redis	3 years
• Mysql	3 years
• GRPC	3 years
• Maven	3 years
• Spring Boot	3 years
• Microservices Architecture	3 years
• AWS	2 years & 9 months
• PostgreSQL	2 years & 2 months
• Kafka	2 years & 2 months
• JUnit	1 years
• Jenkins	1 years

SOFT SKILLS

Teamwork, Problem-solving, Communication, Time management

PROJECT DETAILS

• Paypro Mobile App

Project Description: Developed REST APIs for Mobile Application which includes user profile, Payment Mechanism (Account Pull, IBFT) from Mobile App, Discounts and Promos, OTC, Sign Up or Sign In mechanism, Spilt-Bill System, Push Notifications, Send Money
Responsibilities: Development, testing and maintenance, Code review of junior and code merging
Technologies: Java, Postgres, AWS, Junit, Postman, REST API
Industry: FinTech

• Cards Payments

Project Description: Product consist of integrations with MasterCard and different operators for card payment facilitation, following PCI DSS Compliance to ensure secure handling of payment data . Also incorporate Non PCI DSS flows typically hosted pages and tokenization.
Responsibilities: Development, testing and maintenance, Code review of junior and code merging
Technologies: Java, Mysql, Kafka, AWS, Postman, Vault, Param store, KMS, PL/SQL
Industry: FinTech

EMPLOYMENT HISTORY

• Senior Full Stack Developer

Description: ● Writing clean code using Programming principles to create new Services and Products. ● Design and develop microservices, Restful APIs and New Services Architecture for different projects as per the requirement. ● Third party APIs integrations for acquiring new business needs. ● Collaborate with cross-functional teams to define and design new features. ● Develop new features and research new technologies for existing or new applications. ● Support production issues helping to triage and resolve it. ● Converting old system architecture into efficient microservices. ● Unit test or Smoke test the code. ● Deploying projects on the server. ● Lead code reviews, ensuring adherence to coding standards and best practices. ● Participate in Agile/Scrum development methodologies, including sprint planning, daily stand-ups and sprint reviews.

• Java Developer April-2021 - September-2021

Paypro Private Limited

Description: ● Participate in all phases of SDLC. ● Design and Develop Restful APIs for mobile apps. ● Design and develop APIs for Admin Portal. ● Deployment on Non production and Production servers.

• Software Developer January-2019 - March-2021

National Clearing Company of Pakistan Limited

Description: ● Design and develop new projects with respect to business requirements. ● Provides support to Business Applications known as Capital Gain Tax. ● Creating SRS documents and workflows of new projects as per new business needs. ● Participate in Technology migration activities. ● Provide support to business partners to cater business activities with their coordination. ● Dealing with different broker and non-broker clients to resolve issues.

CERTIFICATION

• Microservices with Spring Boot and Spring Cloud by Udemy 2022

EDUCATION

• Bachelors degree in Computer Systems Engineering from NED University 2015 - 2019

LANGUAGES

• English - advanced
