A senior Full Stack developer with over 7 years of experience specializing in Django and MERN stack applications. I have worked on various projects, from small-scale applications to large-scale applications, which has given me valuable experience in project management, software architecture, and software development life cycle methodologies. My goal is always to keep them satisfied and happy with the work I do. I am committed to using the latest best practices in web development to ensure that your website is easy to maintain, scale, and upgrade in the future. My technical skills: ✪ Front End : TypeScript, JavaScript(ES5 and ES6) React, Next.js, Redux, Thunk, Saga, Hooks, React Native Vue.js, Nuxt.js, Vuex, Vuetify jQuery, Bootstrap, MUI, Ant Design CSS, SCSS, Tailwind CSS, Chakra UI Three.js ✪Back End : Node.js and Express Framework Python, Django, Django REST framework, Flask Java, Spring GraphQL ✪Database MongoDB, Mongoose, MySQL, PostgreSQL, SQLite ✪DevOps Vercel AWS EC2, SES, or S3 services Nginx, Certbot, PM2 Ubuntu servers Github Docker Kubernetes Skaffold

INDUSTRIES: Healthcare, Sports

TECHNICAL SKILLS

• Node.js	6 years & 1 months
• Redux	6 years & 2 months
• React	6 years & 1 months
• JavaScript	6 years & 1 months
• Django	6 years & 2 months
• API Integration	6 years & 2 months
• MongoDB	6 years & 1 months
• Amazon Web Service	6 years & 2 months
• Web App Development	6 years & 1 months
• RESTful API	6 years & 2 months
• Next.js	5 years & 1 months

PROJECT DETAILS

• ZoomCare app March-2022 - October-2022

Project Description: Keeping up with your everyday health needs shouldn’t be a chore. ZoomCare makes it easy to get the care you need, when and where you need it, so you always feel as amazing as you are. 1. SCHEDULE same-day visits with board-certified providers delivering urgent, primary, emergency, and specialist care. Delivering care at over 60 neighborhood clinics across Oregon, Washington, Colorado, and Idaho. 2. CONNECT with a ZoomCare provider virtually—wherever you are. Receive medical diagnosis, treatment, prescription medications, refills, and referrals through VideoCare—all from the comfort of your couch. 3. ACCESS your medical records and see your visit history, doctor notes, and labs all in one place. Easily manage your payment, insurance, and contact info. We're focused on a single goal: reinventing #healthcare to put people in charge of their own #health. No more waiting hours in the waiting room or weeks for an appointment. ZoomCare offers truly ‘waitless’ same-day appointments that always start on time—in your neighborhood and in your pocket.

Responsibilities: The Zoomcare project involved creating a user-friendly and secure healthcare platform that offers real-time scheduling, telehealth appointments, and personalized services for patients and healthcare providers. The platform integrated features like responsive design, data encryption, and third-party integrations to ensure efficient and convenient healthcare interactions.

Technologies: React Native

Industry: Healthcare

• Pickleball April-2023 - November-2023

Project Description: Your Pickleball Companion! Pickleball+ has been designed for players of all experience levels to be able to find courts near you and around the world. Because we've focused on making the app as easy to use as possible, you do not need to love technology as much as you love pickleball to be able to use it. View pictures of each location, read descriptions, read/write reviews, and even get directions to each place from the app. Add and edit details about your favorite places to play pickleball, so others can play there too! You can now even snap a picture of the court in the app and upload it for all to see!

Responsibilities: As full Stack developer, I've developed this project from scratch.

Technologies: MERN Stack

Industry: Sports

EMPLOYMENT HISTORY

• Full Stack Developer February-2021 - September-2023

Description: * Worked with latest technologies including video streaming and blockchain with WebRTC, websocket.io , NFT, web3.js, Solidity, Python, etc * Participated in code collaborations through Github privately and publicly * Built chatbots for Slack, Twitter, Skype, Viber * Developed a code quality-focused tool exploration in Node.js, JS/TS * Automated video clip extraction based on text phrases * Created microservice cloud systems using Kubernetes clusters and Docker

• MERN Stack Developer September-2018 - February-2021

SADA Systems

Description: * Developed stable, configurable, reusable backend systems and designed API backend-frontend interactions with Node.js, ExpressJS, Nest.js, koa.js, AWS ElasticBeanstalk, AWS SES * Created UI components for responsive web applications based on Figma design using React, React hooks, Redux-Saga, React-Router, Bootstrap4 with cross-browser compatibility * Followed the coding standards Airbnb and optimized frontend code using React best practices such as PureComponent, Memoizing React components, Code splitting * Supported content management system development using Next.js and Gatsby along with Contentful CMS, Contentstack, Strapi * Attended daily standups within agile scrum and TDD methodology and broke down the project to several sprints

• JavaScript Developer November-2016 - September-2018

Ensymbios

Description: * Developed webpages using JavaScript, PHP, HTML, CSS * Widely used ClojureScript to emit JavaScript code compatible with the advanced compilation mode of Google Clojure optimizing compiler * Worked with JSON tokens for authentication and authorization security configurations using Node.js * Created functions and assigned roles in AWS Lambda to run Python scripts

EDUCATION

• Bachelors degree in Artificial Intelligence from National University of Singapore 2010 - 2014

LANGUAGES

• English - native
