Software Developer with 1 Years of experience in React JS and basics of Node JS. Knowledge to work Life Cycle, Hooks, Router, Formik, API Integration, and Fetch API. I have a strong background in building complex user interfaces and web applications using React JS. I have experience working with cross-functional teams, collaborating with designers and developers to deliver high-quality applications on time and within budget. My technical skills include: • Strong proficiency in JavaScript, HTML, CSS, and related web technologies • Deep understanding of React JS and its ecosystem, including Redux, React Router, and Material UI • Experience integrating front-end applications with RESTful APIs and other back-end systems • Familiarity with version control tools such as Git and SVN

INDUSTRIES: Human Resources, Logistics

TECHNICAL SKILLS

• React	1 years
• Node.js	1 years
• Python	1 years
• MongoDB	1 years
• Materialui	1 years
• MySQL	1 years

SOFT SKILLS

Critical thinking, Problem-solving

PROJECT DETAILS

• ATS

Project Description: An ATS (Applicant Tracking System) project is a software system that helps employers to manage the hiring process by screening and managing resumes and job applications. The goal of an ATS is to streamline the hiring process, reduce the time and cost associated with recruitment, and improve the quality of hires.
Responsibilities: Designed and developed web pages using React Js,Fluent UI and Material UI. Used React Axios to call Web APIs to fetch data from backend and update the states using useState and useEffect. Validation using Formik and Yup. Used Node.js and Express to build web server and Restfull APIs. Designed MongoDB schema and implemented data access service to Create,Read,Update and Delete data(CRUD)
Technologies: Visual Studio Code
Industry: Human Resources

• Taxi booking Web Application

Project Description: A taxi booking web application is a software system that enables users to book taxis or other ride-sharing services online. The application typically consists of a website or web portal that connects riders with drivers or transportation companies. Users can access the application from any device with an internet connection, including desktops, laptops, smartphones, and tablets.
Responsibilities: Creating a UI Design with bootstrap and material UI. Use Axios for Redux API call and to perform a CRUD Operation. Formik and Yup is designed to manage forms with complex validation. React Router Dom is used to build single page applications
Technologies: Redux API, React Js, Node JS
Industry: Logistics

EMPLOYMENT HISTORY

• Software Developer

Description: Having knowledge in writing SQL Queries using Sub Queries and Joins. Knowledge in Transactional script writing using DDL, DML, TCL, and DCL and built-in Functions & Stored Procedures. Knowledge to work Life Cycle, Hooks, Router, Formik, API Integration and Fetch API. Good knowledge of Axios CRUD Operation and REDUX.

EDUCATION

• Bachelors degree in BE.CS from Mahindra Institute of Technology 2015 - 2019

LANGUAGES

• English - intermediate
